

ESG Benefit Company Eco Allies Planning \$20mil SEC Reg A+ Registration

Las Vegas, Nevada 2/23/21 --StereoVision-- a publicly traded Nevada corporation OTC: SVSN announced today that their for-profit majority-owned subsidiary the Nevada ESG Benefit company Eco Allies Inc is planning to file an SEC Reg A+ Registration for twenty million dollars. StereoVision's CEO Jack Honour stated, "with the Reg A+ Congress has provided a powerful platform for companies to raise capital in a way that's efficient, cost-effective, and in the case of StereoVision, non-dilutive to the Company's shareholders. StereoVision invested assets in Eco Allies that they acquired in their Climate Cure Capital acquisition. Eco Allies agreed to pay StereoVision 2.5mil shares of Eco Allies' common shares for the assets making StereoVision Eco Allies' majority shareholder."

Eco Allies™ (EA) <http://ecoallies.biz> a recently formed Nevada ESG Benefit corporation is pursuing opportunities in the Climate Change Mitigation Industry. Eco Allies' funding plan is to leverage their 230,000 tons of carbon offset credits and the 5,000,000 seeds for their trademarked SuperGreenTree™ that the Company has valued at \$.25 each. Industry expert Phillip Skalzo said Eco Allies' SuperGreenTrees would yield approximately \$44.00 each over 3 years and that's just for the biomass. Each tree will sequester approximately one ton of carbon per year.

One million SuperGreenTrees™ can be planted on 2,500 warm weather acres generating 1,000,000 tons of carbon offset credits per year. SuperGreenTrees grow to 60' and are harvested every three years from the same plant structure. They have a 20-year lifespan. The Eco Allies team has successfully grown SuperGreenTrees in California for over 10 years. Eco Allies plans to acquire 2,500+ acres of farmland for their first SuperGreenTree farm and establish farming operations from the proceeds of the Reg A+ offering. Ultimately EA plans to expand their farming operations to 12,500 acres growing forests totaling 5,000,000 SuperGreenTrees.

Eco Allies currently has 230,000 tons of carbon offset credits on their books. The Company's priced them at \$12.95 per ton and they can be purchased at Eco Allies E-commerce store http://www.ecoallies.biz/buy_carbon_offset_credits_online.html. While the price per ton of carbon offset credits is unsettled, going forward the Company believes with the government dedicating \$1.7 trillion to the climate change battle and the fossil fuel companies having to acquire more carbon offsets, and with a growing number of corporations and private citizens seeking to become carbon neutral, the demand for carbon offset credits can only expand.

As outlined in Hellen Avery's comprehensive article 'Voluntary Carbon Offsets the Next Big Investment'. [Euromoney Voluntary carbon offsets – the next big investment](#) Brookfield Asset Management's Mark Carney has launched the 'Taskforce on Scaling Voluntary Carbon Offset Markets'. It's sponsored by DBS, Blackrock, Goldman Sachs, UBS, Itau Unibanco, BNP Pariba,

and the Institute of International Finance with William Winters Standard Chartered Chief Executive as chair. This recent wave of support bodes well for the carbon offset credit industry.

SuperGreenTree biomass makes the best biochar. Eco Allies has entered a Joint Venture with BioChar Now LLC, the premier biochar company in America. Biochar pioneer James Gaspard, BioChar Now's CEO, is on the Board of Directors of Eco Allies and Eco Allies parent company, StereoVision. Biochar is primarily used as eco-friendly fertilizer. Among its many other patented uses BioChar Now's biochar mitigates the algae bloom that causes the economic and wildlife devastation of Red Tide.

When included in livestock feed, BioChar Now's USDA approved biochar reduces the methane in animal excrement by 25%. From the proceeds of their Reg A+ Eco Allies plans to launch an Eco Allies™ branded livestock feed with BioChar Now's biochar for the annual \$350 billion livestock feed industry. Also, from the proceeds of the Reg A+, Eco Allies plans to build a biochar manufacturing facility adjacent to its SuperGreenTree farm

Climate Cure Capital Corporation, (CC) <http://climatecurecapital.com> a StereoVision wholly-owned subsidiary and member of the Eco Allie's, BioChar Now J/V has been in negotiations regarding renewable energy projects for a number of municipalities. Climate Cure's CEO William Barnwell, a 20-year renewable sustainable industry veteran and integral member of the Eco Allies management team, has begun developing the structure and team for Climate Cure Capital's new offset credits trading exchange. A key goal of Climate Cure Capital's expansion plan is to become something of a mini-Intercontinental Exchange (NYSE ICE)

Mr. Barnwell sits on Eco Allies and StereoVision's Boards of Directors. He's taken the lead on attacking a number of critical Climate Change issues that are most damaging to the environment. Such as LMOP projects. (Landfill Methane Outreach Program) Climate Cure created LMOP ACP's. Also, sequestering fluorocarbons from the thousands of refrigerators destroyed along the Gulf coast by last year's hurricanes. Climate Cure plans to gather destroyed and obsolete refrigerators and sequester the lethal fluorocarbons used as a coolant and properly scrap the metal. The fluorocarbon offset credits are the diamond of carbon offset credits. These are some of the projects to be funded from a completed Eco Allies \$20mil Reg A+ stock offering.

StereoVision Entertainment Inc. <http://stereovision.com> OTC:SVSN a Nevada publicly traded company utilizing its award-winning team of industry professionals in the areas of (1) climate change mitigation through its wholly-owned subsidiary Climate Cure Capital Corporation <http://climatecurecapital.com/> and majority-owned Eco Allies Inc., <http://ecoallies.biz>, a Nevada ESG Benefit company (2) creating ESG multi-media content with its 9-time Emmy Award winning production company, REZN8. <http://rezn8.com>
