

## **Climate Cure Capital Corporation Appoints Leading Climate Change Mitigation Expert Dimitri Rakopoulos to Their Board of Directors**

Las Vegas 6/9/2022 Climate Cure Capital Corporation, a StereoVision wholly owned subsidiary, announced today that they had appointed climate change mitigation industry expert Dimitri to their Board of Directors.

Dimitri Rakopoulos - a seasoned executive, with an extensive academic background in Mechanical Engineering and Business Administration. He completed his studies at Queen Mary College and City University in London.

During his career, he has held various positions from running plastics processing plants producing PE, PP and PVC related products. Dimitri gradually rose to the CEO position of the group and became the driving force behind the sale of the company to a subsidiary of a major International publicly trading corporation.

Dimitri maintained his business activities based both in Europe and the U.S. between 1993 and 2010 at which time he moved all his business operations to the U.S. In 2011 he returned to the plastics processing industry setting up a production facility in the N.E. U.S. designing the project from the ground up. Setting up production, identifying and acquiring on behalf of the stakeholders a series of distributors to quickly attain market share. He was involved in the valuation process of non-publicly traded companies and involved in the acquisition process as well as the integration of the acquired companies. He created a solid vertically integrated entity with value built for the shareholders.

In 2013 he transitioned to the associated field of oil and gas initially in the Mid-stream sector and gradually phasing into the upstream and downstream sectors always attaining the goals set by the stakeholders under budget and within the set time frames.

The combination of the climate legislation introduced in the Paris Accord, the Kyoto Protocol and recently the United Nations Climate Change Conference in Glasgow triggered his active involvement in the energy transition ecosystem and the integrated roadmap to convert a carbon positive operation to a carbon negative project, and the generation of compliance and voluntary carbon offset credits.

Dimitri is an expert in assessing and quantifying the emission generating parameters. Using a combination of natural means, hybrid means (such as photobioreactors), proven innovative engineering systems (carbon capturing and sequestering lines), hydrogen fuel cell systems, hydrogen fueled power generating systems (using reciprocating engine technologies), Waste to energy lines. Once a project becomes Carbon Negative, Dimitri registers the project with internationally accredited authorities and obtains all the necessary certifications to allow for the generation of institutional grade carbon offset credits.

His newly appointed position to the Climate Cure Capital Corp Board of Directors aims to bring additional carbon reduction emission projects and carbon offset generating projects into the project portfolio of Climate Cure Capital Corporation.
